PARIS, FRANCE

The Clinical Workshops

Definition:

These clinical workshops simulate clinical OR (operation room) or ICU /Emergency scenarios which serve as basis to teach the different ultrasound guided blocks to our delegates. These workshops are **HANDS ON** with **ACTIVE** ultrasound scanning on models by the delegates. This definition is valid for all clinical workshops (adults, paediatrics, chronic pain and the POCUS & workshops)

Number of Workstations per Workshop:

4-6 Workstations with different scenarios.

One demonstrator with one US (ultrasound machine) and one **paediatric** model per Workstation.

Ultrasound – workshop ratio:

4-6 US with one **paediatric** model each per workshop (1 workshop covers 4-6 clinical scenarios)

Ultrasound – delegate ratio:

1 : 6 (-7) = ideal for a total of 36 (- 42) delegates

Instructors:

There will be one instructor per workstation = 4-6 demonstrators per workshop

Chairman:

There will be one Chairman per workshop (usually **NOT** actively (=teaching) involved in the assigned Workshop)

Material needed:

With every US there must be one male or female **paediatric** model!

Complete US equipment (battery loaded, working connection for power supply), enough gel for all workshops, appropriate towels to clean the US-probe. One stretcher or other comfortable surface and pillows for positioning the **paediatric** models for a duration of up to 3 hours for scanning them in different positions. Enough towels and blankets to cover the **paediatric** models. A least one pillow per stretcher / **paediatric** model. One bathing gown per **paediatric** model (for the time between the workshops, or the models are told to easily removable sport wear). Enough paper towels to clean the gel from the **paediatric** models for all workshops. Per workstation (1 US, 1 **paediatric** Model, 1 stretcher): water-soluble skin pen to paint on the models.

3 chairs per workstation (for instructor and for **paediatric** model & parent between the sessions)

Perfect set-up:

See document «Clinical Workshop set-up»

Support from US companies needed :

At least 1 person per workshop present per US-Company (Sonosite, BK, GE, Mindray etc.) until the instructor feels comfortable with the US

6TH WORLD CONGRESS

6—9.SEP
2023
PARIS, FRANCE

Projection for presentations :

NOT needed. Each instructor can take her/his laptop to show in his group some anatomical details but there will not be a presentation for all delegates.

Responsibles on site :

- Program Coordinator : Alain Delbos
- Scientific committee : José Aguirre (0041 76 331 11 48), responsible for The Clinical Workshops
- PCO : MCO, esraworld2023@mcocongres.com
- Congress Center : Palais des congrès de Paris – ViPARiS
- Back-up : A back-up of demonstrators is organized to possibly cover unplanned absences or to offer more scenarios for a high number of delegates.

Who to inform in the case of problems?

ALL information concerning

- Problems with number of models / ultrasounds (not enough to run a workshop etc)
- Non-show by demonstrators
- Cancellation by demonstrators prior to the workshop
- Problem with rooms which cannot be solved prior to a workshop
- Problems with the number of candidates (Workshop is over-booked, need for more instructors etc)

has to be shared with:

José Aguirre : 0041 76 331 11 48, responsible for the Clinical WS to avoid delays, an unfavourable ultrasound – delegate ratio or other problems.
